CHAIYA

From Neighbourhood Habit to India's Daily Social Brew

A 5-part rebranding and 3-year growth strategy addressing brand erosion, Gen-Z disengagement, and commoditization — within zero-supply-chain-change and zero-big-budget constraints.

01 Diagnosis 02 Repositioning 03 Experience & Packaging 04 Loyalty & Community 05 Roadmap & Targets

Trapped in “No-Man’s Land”

Symptoms vs. root cause across four evidence categories

CATEGORY	SYMPTOMS (DATA EVIDENCE)	ROOT CAUSE
Financials	Revenue slid ₹16.8 Cr → ₹15.9 Cr (2026) despite opening a new store	Zero brand loyalty — chosen for proximity, not preference
Retention	Repeat rate 52% → 47%; monthly visits 3.1 → 2.7	Commoditization — “similar chai available anywhere”
Demographics	Gen-Z (18–24) share collapsed 31% → 23%	Lacks social currency vs. newer hangout cafés
Perception	Distinctive score 29% → 17%; Modern score 31% → 19%	Unclear value prop — neither cheapest tapri nor modern café
Core problem: CHAIYA has become a transactional commodity — functional when nearby, but lacking the emotional resonance, social experience, and distinctiveness needed to drive repeat visits and win back younger customers.
